

VINREADY · FOR BUILDERS

Starlink ready from day one

The builder offer your buyers ask for,
with margin built in.

Builder pack · VINCONNECT

Why builders add VinReady

Internet stops being a build cost and starts earning.

01 A new margin line.

Builder cost \$450–\$800. You add the margin and set the buyer's price.

02 Upgrade or inclusion.

Sell it as an upgrade, or make it standard on every home.

03 Online on move-in day.

Your buyers can activate Starlink the day they move in.

04 No lead-in wait.

Nobody waits on an NBN lead-in, or for the estate rollout to catch up.

05 Scheduled to your build.

Installs are tied to your build dates, not squeezed in after handover.

06 Handover pack included.

Every buyer gets a VinReady home-buyer handover pack.

Frame stage. Image: illustrative.

Your cost. Your margin.

You set the price your buyers see. These are ranges, not a fixed quote. The home and the option change the cost.

\$450–\$800

Your builder cost

\$500–\$2,000

The margin you add

Worked example · illustrative

	Lower end	Upper end
Your builder cost	\$450	\$800
Your margin	\$500	\$2,000
Price to your buyer	\$950	\$2,800

Illustrative only: the two ends of the ranges. Your cost depends on the option and the home. Your margin is your call. The Starlink subscription is always between the buyer and Starlink.

TWO OPTIONS

Two ways to offer it

Offer one option or both.

OPTION 1

Starlink Ready

We do

Make the home Starlink ready.

Starlink order

Your buyer orders direct from Starlink.

Getting online

Your buyer contacts us for final fit-off.

Move-in day

Activate on move-in day. No lead-in wait.

Suits

Buyers who want to order their own dish, with NBN still open.

OPTION 2

Full hardware kit

We do

Supply a full hardware kit, dish included.

Starlink order

Hardware is supplied by us.

Getting online

Your buyer self-activates.

Move-in day

Live when it is powered up. No lead-in wait.

Suits

Buyers who want it in place, ready to switch on.

Both options: builder cost \$450–\$800. The subscription stays between your buyer and Starlink.

HOW IT WORKS

Built into your program

1

You add it

Upgrade or inclusion. Tell us the lot and the option.

2

We schedule it

The install is tied to your build dates.

3

We do the work

Done during the build, through your site contact.

4

Handover

Pack included. Option 1 is fit-off. Option 2 is self-activate.

1 Frame

Mark the cable path while the frame is still open.

2 Lock-up

Mount point and a weatherproof entry. No dish yet.

3 Near handover

Rectangular dish on the roof. Router at the point inside.

Australian frame, then the finished roof with a rectangular dish. Images: illustrative.

Your go-to Starlink answer

“Yes. This home can be VinReady. It is set up for Starlink during the build, so you can activate it on the day you move in, with no waiting for an NBN lead-in.”

Finished Australian project home. Image: illustrative.

How does it compare with NBN?

It is another way to get online. Buyers can activate on move-in day, with no lead-in wait. Starlink is price-competitive with NBN plans. It does not replace NBN.

Which option do I get?

Option 1: you order Starlink, we do the fit-off. Option 2: the kit is supplied and you activate it.

What do I get at handover?

A VinReady home-buyer handover pack. Install or activation questions come to VINCONNECT on 0408 559 555.

Keys in. Online today.

Your buyers can activate Starlink the day they move in. With the full kit, they tap Activate Starlink in the app and it is live when the dish is powered up.

During construction vs after handover

 VINREADY DURING THE BUILD	 RETROFIT AFTER HANDOVER
 Conduits before plaster	 Cutting into finished walls
 Rough-in at frame stage	 External conduits after cladding
 Cabinet chosen early	 Limited space left
 Three visits coordinated	 Extra call-backs
 Clean handover	 Internet fixed later

Illustrative comparison. Typical outcome, not a promise about a particular estate.

- Starlink is an alternative at move-in. NBN can stay available.
- No guaranteed speeds. Performance depends on Starlink at that address.
- VINCONNECT is an independent installer. Not part of Starlink or NBN.

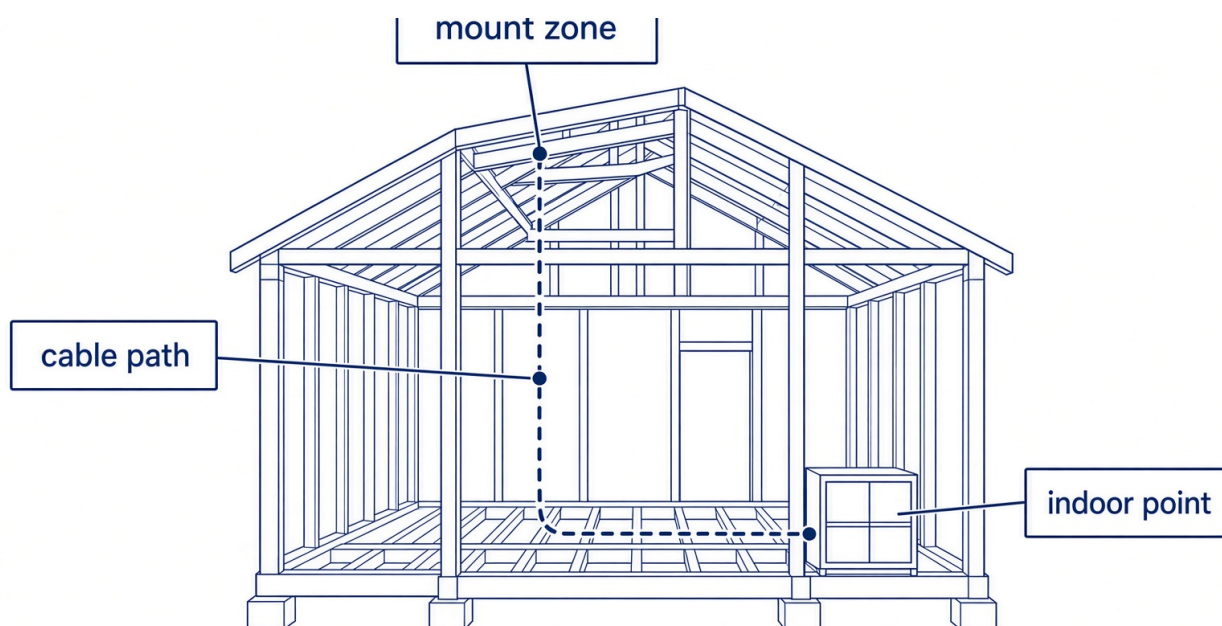

NEXT STEP

Add VinReady to your homes

Tell us where you build. We'll show you how it fits.
