

Event Link one-pager

VINCONNECT Event Link is a rapidly deployable Starlink and managed Wi-Fi kit for agricultural shows, field days, clubs and rural community events. There is no retail SKU yet.

What stands up in the paddock

- Starlink as the upstream internet (organiser plan, or included in the activation quote)
- Managed outdoor-capable Wi-Fi for the hub, committee area or public seating
- Labelled network case; guest network kept apart from operations
- Pack-down and handover so the next volunteer is not guessing

What it is not

- A carrier-grade network for an entire showgrounds
- A substitute for an existing paid venue Wi-Fi contract unless scoped
- A marketing list — community Wi-Fi does not require a marketing opt-in

Drawn from VINCONNECT's Rural Connections discussion paper. No separate Event Link brochure was on file; this is the public brief.
