

# Event Link one-pager

VINCONNECT Event Link is a rapidly deployable Starlink and managed Wi-Fi kit for agricultural shows, field days, clubs and rural community events. It is a 2026–27 pilot, not a product you can buy off the shelf.

## What stands up in the paddock

- Starlink as the upstream internet (organiser plan, or included in the activation quote)
- Managed outdoor-capable Wi-Fi for the hub, committee area or public seating
- Labelled network case; guest network kept apart from operations
- Pack-down and handover so the next volunteer is not guessing

## What it is not

- A carrier-grade network for an entire showgrounds
- A substitute for an existing paid venue Wi-Fi contract unless scoped
- A marketing list — community Wi-Fi does not require a marketing opt-in

Organisers can register interest. Coverage is the area we agree, not an entire showgrounds.
